

Instructions

- 1 Grab your scissors and carefully cut along the red line to release the *Spinner Base* and the *Arrow*.
- 2 Use your scissors or a hole punch to poke a hole in the spot marked on the spinner base – and another one on the arrow.
- 3 Line up the *Arrow* on top of the *Spinner Base* so the holes match up. Push a paper brad (a split pin) through both holes to connect them. Leave it just a bit loose so the arrow can spin freely and smoothly around the base.
- 4 Set up the rest of the game pieces, and you're ready to play your very own game of Spinclusion!

Materials

Scissors, a hole punch and one paper brad.

Arrow

Spinner Base
